

# This was CS50

Harvard Extension School (<https://www.extension.harvard.edu/>)

Fall 2020

## Problem Set 3

Collaboration on problem sets is not permitted except to the extent that you may ask classmates and others for help so long as that help does not reduce to another doing your work for you, per the course's policy on [academic honesty](#).

### What to Do

Are you an edX student? Don't attempt to follow these instructions! Head over to [cs50.edx.org](https://cs50.edx.org) (<https://cs50.edx.org>), or [cs50.harvard.edu/x](https://cs50.harvard.edu/x) (<https://cs50.harvard.edu/x>), and use the instructions there instead! These instructions are only for the on-campus course!

1. Submit [Plurality](#).
2. Submit one of:
  - [Runoff](#), if feeling less comfortable
  - [Tideman](#), if feeling more comfortable
3. Submit [this form](https://forms.cs50.io/2020/fall/pset3/harvard) (<https://forms.cs50.io/2020/fall/pset3/harvard>).

If you submit both Runoff and Tideman, we'll record the higher of your two scores.

### When to Do It

By Mon, Sep 28, 2020, 5:59 AM GMT+2.

### How to Get Help

- Browse or search for answers on [Ed](https://vault.cs50.io/6027a62f-c1c6-42db-8b79-25c3e09eb10c) (<https://vault.cs50.io/6027a62f-c1c6-42db-8b79-25c3e09eb10c>) or post your own questions!
- Browse the [CS50 Manual Pages](https://manual.cs50.io/) (<https://manual.cs50.io/>) for functions that might be useful.
- Watch [Shorts](#) for any topics that you still have questions about.
- Attend [office hours](#)!

### Advice

- Try out any of David's programs from class via [Week 3](#)'s sandboxes.
- If you see any errors when compiling your code with `make`, focus first on fixing the very first error you see, scrolling up as needed. If unsure what it means, try asking `help50` for help. For instance, if trying to compile `hello`, and

```
make plurality
```

is yielding errors, try running

```
help50 make plurality
```

instead!
