## Problem Set 5

Collaboration on problem sets is not permitted except to the extent that you may ask classmates and others for help so long as that help does not reduce to another doing your work for you, per the course's policy on [academic honesty](#).

## What to Do

Are you an edX student? Don't attempt to follow these instructions! Head over to [cs50.edx.org](https://cs50.edx.org) (<https://cs50.edx.org>), or [cs50.harvard.edu/x](https://cs50.harvard.edu/x) (<https://cs50.harvard.edu/x>), and use the instructions there instead! These instructions are only for the on-campus course!

- Attend [office hours](#)!

## Advice

- Try out any of David's programs from [Week 5](#).
- If you see any errors when compiling your code with `make`, focus first on fixing the very first error you see, scrolling up as needed. If unsure what it means, try asking `help50` for help. For instance, if trying to compile `hello`, and

```
make speller
```

is yielding errors, try running

```
help50 make speller
```

instead!
